Board Memo 037-2024: Public Meeting Notices to Facilities Regarding MPFR Results

Executive Board,

NAPS HQ has been informed of USPS intent to provide notices announcing public meetings, stand up talks, and press releases to share results and additional feedback based on Mail Processing Facility Reviews (MPFR).

Below is a list of the P&DCs along with the public meeting dates.

- **McAllen, TX P&DC to San Antonio, TX P&DC**
 - o Date & Time: Tues., March 26th at 4:30pm
 - o Location: McAllen Main Library – Meeting Center Auditorium, 4001 N 23rd Street, McAllen, TX 78504

- **North Platte, NE P&DC to Denver, CO P&DC**
 - o Date & Time: Thurs., March 28th at 6pm
 - o Location: Sandhills Convention Center, 2102 S Jeffers Street, North Platte, NE 69101

- **Santa Barbara, CA P&DC to Santa Clarita, CA P&DC**
 - o Date & Time: Tues., March 26th at 6pm
 - o Location: Leta Santa Barbara Goleta, 5650 Calle Real, Goleta, CA 93117

- **Springfield, IL P&DC to St. Louis, MO P&DC**
 - o Date & Time: Tues., March 26th at 6pm
 - o Location: Hilton Garden Inn, 3100 S. Dirksen Parkway, Springfield, IL 62703

- **Waterloo, IA P&DC to Des Moines, IA P&DC**
 - o Date & Time: Tues., March 26th at 2pm
 - o Location: Cedar Falls Public Library, 524 Main Street, Cedar Falls, IA 50613

- **White River Junction, VT P&DC to Hartford, CT P&DC**
 - o Date & Time: Tues., March 26th at 6pm
 - o Location: Hilton Garden Inn Hanover/Lebanon, 35 Labombard Road, Lebanon, NH 03766

Please share this information with your membership.

Thank you, and be safe.

Dear Ivan:

This is in further reference to the Postal Service's January 10 correspondence (enclosed) announcing its intent to conduct Mail Processing Facility Reviews (MPFR) at several locations. Reviews were conducted at the following six facilities to determine whether efficiency and/or service could be improved by consolidating mail processing operations into other mail processing facilities:

- McAllen, Texas (TX) Processing and Distribution Center (P&DC) to San Antonio, TX P&DC
- North Platte, Nebraska (NE) P&DC to Denver, Colorado (CO) P&DC
- Santa Barbara, California (CA) P&DC to Santa Clarita, CA P&DC
- Springfield, Illinois (IL) P&DC to St Louis, Missouri (MO) P&DC
- Waterloo, Iowa (IA) P&DC to Des Moines, IA P&DC
- White River Junction, Vermont (VT) P&DC to Hartford, Connecticut (CT) P&DC

The initial results of all six facility reviews support the business case for keeping each facility open and modernized as a Local Processing Center. The next step is to provide notice of a public meeting to share the initial results of the studies and to allow members of the community to provide additional feedback. Enclosed are the following communication materials that are intended to be communicated today for each of the six locations:

- Stand Up Talks (SUT) to employees
- Notices of Public Meetings
- Press Releases

Please contact Paulita Wimbush at ext. 4042 if you have questions regarding the matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "Bruce A. Nicholson".

Bruce A. Nicholson
Director
Labor Relations Policies and Programs

Certified Mail Number
 9589 0710 5270 0684 7735 32

Dear Ivan:

This is an informational notice of the Postal Service's intent to conduct Mail Processing Facility Review (MPFR) studies in:

Abilene, Texas (TX)	Midland, Texas (TX)
Bemidji, Minnesota (MN)	Missoula, Montana (MT)
Brockton, Massachusetts (MA)	North Platte, Nebraska (NE)
Burlington, Vermont (VT)	Peoria, Illinois (IL)
Casper, Wyoming (WY)	Quad Cities, Illinois (IL)
Champaign, Illinois (IL)	Raleigh, North Carolina (NC)
Charleston, South Carolina (SC)	Reno, Nevada (NV)
Corpus Christi, Texas (TX)	Santa Barbara, California (CA)
Fresno, California (CA)	Sioux Falls, South Dakota (SD)
Grand Junction, Colorado (CO)	South Jersey, New Jersey (NJ)
Gulfport, Mississippi (MS)	Springfield, Illinois (IL)
Iron Mountain, Michigan (MI)	Tulsa, Oklahoma (OK)
Johnstown, Pennsylvania (PA)	Waterloo, Iowa (IA)
Manchester, New Hampshire (NH)	White River Junction, Vermont (VT)
McAllen, Texas (TX)	Yakima, Washington (WA)

In accordance with Handbook PO-408, *Mail Processing Facility Review*, an MPFR determines the feasibility of changing mail processing operations to improve operational efficiency and/or service. An MPFR involves the consolidation of all originating and/or destinating distribution operations from one or more Post Offices/facilities into other automated processing facilities for the purpose of improving operational efficiency and/or service. The intent is to use Postal Service equipment, facilities, staff work hours and transportation more efficiently.

Specifically, feasibility studies will be conducted at thirty mail processing facilities to determine whether efficiency and/or service could be improved by consolidating some mail processing operations into other mail processing facilities. A list of the thirty facilities that will be studied is enclosed.

Enclosed are the Notices of Intent, Press Releases, Stand-Up Talks and Frequently Asked Questions that will be distributed today for the thirty facilities that will be studied.

Please contact Paulita Wimbush at extension 4042 if you have questions concerning this matter.

Sincerely,

Bruce A. Nicholson
Director

**Mail Processing Facility Review
Notice of Public Input Meeting**

Springfield P&DC in Springfield IL to St. Louis P&DC in St. Louis MO

March 11, 2024

As part of a \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks, the U.S. Postal Service announced that it is conducting an evaluation of current operations and potential future uses of its Springfield Processing and Distribution Center (P&DC) facility in Springfield IL.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

Public input will be considered as part of the review. A public meeting will be held to share the initial results of the study and to allow members of the local community to provide their feedback and perspectives on the Initial Findings of the MPFR. The meeting will be held on Tuesday, March 26, at 6:00 PM at the Hilton Garden Inn, 3100 S. Dirksen Parkway, Springfield, IL 62703. A summary of the MPFR will be posted on about.usps.com at least one week prior to the public input meeting.

Members of the local community may submit comments at:
<https://www.surveymonkey.com/r/mpfr-springfield-il>.

Below are some preliminary highlights from the study:

Business Case

The Postal Service is investing heavily in operations as it moves to modernize the nation's postal network, improve customer service, and achieve the organization's goal of 95% on-time delivery across all mail products.

The initial results of the facility review support the business case for keeping the Springfield IL P&DC open and modernizing the facility as a Local Processing Center (LPC) with simplified processes and standardized layouts. The Springfield IL LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. The facility will offer expanded and streamlined package processing capabilities in the local market and new workplace amenities for USPS employees. Additionally, the business case supports transferring some mail processing operations to the St. Louis P&DC.

Future of Facility

The Springfield IL P&DC will remain open and will be modernized. It will be repositioned as a Local Processing Center for destinating mail processing. It is expected that this facility will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem.

Local Customers

- Retail and other services currently available at the Springfield IL P&DC will not change.
- Business mail acceptance will remain the same.
- A local postmark will continue to be available at retail post offices.
- Delivery times of mail to residence and businesses should not change throughout this review.

Commercial Mailers

- Mailers who presort mail will continue to receive appropriate postage discounts.
- Mailers who drop ship to Destination Sectional Center Facility (DSCF) can expect no changes if the MPFR is approved.

Please go to <https://www.surveymonkey.com/r/mpfr-springfield-il> to submit written comments. All written comments must be received by April 10, 2024.

USPS Proposes Improvements to Mail Operations at Springfield Processing Facility

Facility to remain open and modernized as a Local Processing Center to improve mail and package flow through the region

Investments part of USPS 10-year Delivering for America plan to modernize the nation's aging postal network

Public meeting to be held Mar. 26

SPRINGFIELD, IL — As part of a \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks, the U.S. Postal Service is conducting an evaluation of current operations and potential future uses of its Springfield Processing and Distribution Center (P&DC) facility in Springfield, IL.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

The initial results of the facility review support the business case for keeping the Springfield IL facility open and modernizing the facility as a Local Processing Center (LPC). The Springfield IL LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. The facility will offer expanded and streamlined package processing capabilities in the local market and new workplace amenities for USPS employees – part of the Postal Service's \$40 billion investment in the nation's aging postal network.

Additionally, the business case supports transferring some mail processing operations to the St. Louis P&DC in St. Louis, MO. This would mean a significant percentage of the mail collected locally will travel across the wider USPS transportation and processing network over significant distances to reach their final destinations in a more efficient manner. Mail and packages destined for outside the local area may receive better service and be more cost effectively distributed by aggregating it with mail and packages

from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.

A public meeting will be held on Tuesday, Mar.26, at 6:00 PM at the Hilton Garden Inn, 3100 S. Dirksen Parkway, Springfield, IL 62703. USPS will share the initial results of the study and allow members of the community to provide oral feedback and perspectives on the Initial Findings of the MPFR. A summary of the MPFR will be posted on about.usps.com at least one week prior to public input meeting.

Members of the local community may submit written comments at <https://www.surveymonkey.com/r/mpfr-springfield-il> through Apr. 10, 2024. The public's input will be considered prior to a final decision.

The Postal Service will work closely with its unions and management associations throughout the facility review and will continually monitor the impact of any changes that are implemented and will adjust plans as necessary and appropriate.

###

Please Note: The United States Postal Service is an independent federal establishment, mandated to be self-financing and to serve every American community through the affordable, reliable and secure delivery of mail and packages to nearly 165 million addresses six and often seven days a week. Overseen by a bipartisan Board of Governors, the Postal Service is implementing a 10-year transformation plan, [Delivering for America](#), to modernize the postal network, restore long-term financial sustainability, dramatically improve service across all mail and shipping categories, and maintain the organization as one of America's most valued and trusted brands.

The Postal Service generally receives no tax dollars for operating expenses and relies on the sale of postage, products and services to fund its operations.

Stand-Up Talk March 11, 2024

Mail Processing Facility Review Public Meeting to be held re: Springfield IL P&DC

On January 10, we shared that we were beginning an evaluation of current operations and potential future uses for this facility. This review is part of our 10-year strategic Delivering for America plan and our \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

The initial results of the facility review support the business case for keeping this facility open and modernized as a Local Processing Center (LPC). Repurposing this facility as a Local Processing Center is consistent with the broader network redesign outlined in the DFA Plan. Springfield IL LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. It will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

Additionally, the business case supports transferring some mail processing operations to the St. Louis P&DC in St. Louis, MO. This will mean, a significant percentage of the mail collected here will travel across our wider transportation and processing network over significant distances to reach their final destinations in a more efficient manner. Mail and packages destined for outside our local area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.

As updates are made to the facility and its operations, there will be no career employee layoffs.

The Postal Service will hold a public meeting to allow the local community to provide their feedback and perspectives on the Initial Findings of the review on Tuesday, March 26, at 6:00 PM at the Hilton Garden Inn, 3100 S. Dirksen Parkway, Springfield, IL 62703. Attendance will be voluntary and off-the-clock for employees who choose to attend.

Comments on the proposal from employees and the public will be considered before any decision is made. Comments may be submitted at <https://www.surveymonkey.com/r/mpfr-springfield-il>. You can submit your comments on the study up to 15 days after the public meeting.

Thank you for your attention. We will keep you updated as we move through the facility review process and additional initiatives to modernize our postal network.

MAIL PROCESSING FACILITY REVIEW FREQUENTLY ASKED QUESTIONS

1. Why is USPS conducting a review of this facility?

This review is part of a \$40 billion investment strategy to upgrade and improve processing, transportation, delivery networks and employee experiences across the country. The Springfield IL Processing and Distribution Center (P&DC) facility has been selected as a candidate for evaluation of its current operations and potential future uses that may lead to overall modernization and enhancement initiatives at the facility.

The review will not result in this facility's closure or career employee layoffs.

2. What did the MPFR evaluate?

In connection with the review, the Postal Service evaluated the following:

- a. Whether efficiency could be increased by transferring some mail processing operations currently performed at the Springfield IL P&DC to the St. Louis P&DC. A significant percentage of the mail collected in Springfield will travel across our wider transportation and processing network over significant distances to reach their final destinations. Mail and packages destined for outside the Springfield area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.
- b. Whether efficiency can be increased, and service improved, regardless of any determination to transfer some mail processing operations out of the Springfield facility, by investing in the Springfield facility to redesign mail processing operations to accommodate changing mail products and mail flow with modern operating strategies, equipment, and improved employee amenities.
- c. Whether efficiency can be improved and/or service enhanced, regardless of any determination to transfer some mail processing operations out of the Springfield facility, by expanding operations at the facility including adding Sorting & Delivery Center functions currently being deployed throughout the nation, incorporating expanded retail functions currently being evaluated and deployed throughout the nation, and/or increasing local package delivery functions including local transportation initiatives supporting new products being introduced.

3. When will a final decision be announced?

The Postal Service anticipates communicating initial findings in the coming month or two.

4. What does the facility review mean for local employees?

The review will not result in career employee layoffs. Our DFA plan is focused on improving the workplace experience for all employees by investing in facility conditions – including better space and lighting. Throughout the review process, we will continue to communicate regularly with the unions and management associations to support local employees as appropriate.

5. How can the public provide input in the process?

Members of the local community may provide feedback and perspectives on the Initial Findings of the MPFR at a public meeting to be held on Tuesday, March 26, 6:00 PM at the Hilton Garden Inn, 3100 S. Dirksen Parkway, Springfield, IL 62703 or submit comments at <https://www.surveymonkey.com/r/mpfr-springfield-il>. A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

6. How will local Post Office or retail operations be impacted by the review process?

The purpose of conducting this review and implementing our 10-year strategic plan is to improve service delivery and our overall retail experience. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will not slow down as a result of this review.

7. What would repurposing this facility look like?

While it may be determined that moving some mail processing operations from this facility is a good business decision, it is highly likely under those circumstances that the facility will be modernized and repurposed as a Local Processing Center, a Sorting & Delivery Center, or both, consistent with the broader network redesign outlined in the DFA Plan. Any such repurposing will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

8. What is a Local Processing Center (LPC)?

Local Processing Centers are critical nodes in our new end-to-end network model. They are the connective node between Regional Processing & Distribution Centers (RPDCs) to Sorting & Delivery Centers – and will ensure a streamlined flow of mail and packages in a logical and integrated manner. As an LPC, the facility amenities – including lighting, space, and bathrooms – would be improved.

9. What is a Sorting & Delivery Center (S&DC)?

Within a region, S&DCs will expand our network reach. S&DCs will aggregate delivery units into fewer, larger, and centrally located sites to provide faster and more reliable mail and package delivery over a greater geographic area, as compared to traditional delivery units.

As with RPDCs, S&DCs will be repurposed existing facilities as well as new buildings. In each S&DC, we will install package sorting equipment to reduce manual handlings and improve throughput. Employee amenities such as lighting, bathrooms, and breakrooms, will also be improved.

We have opened 31 S&DCs since the DFA plan launched. We plan to open another 36 in coming months.

10. What are the long-term benefits of implementing the Delivering for America Plan and modernizing the postal network?

There are many benefits derived from realizing the Delivering for America 10-year Plan. Implementation of the plan will lead to a better everything including better service performance for our customers; better employee morale and retention rates; better facility conditions; a better carbon footprint; better sequencing of mail and packages; better opportunities for our customers to reach a larger population in less time, and overall, a better customer experience.

Mail Processing Facility Review Notice of Public Input Meeting

Santa Barbara P&DC in Goleta CA to Santa Clarita P&DC in Santa Clarita CA

Mar 11, 2024

As part of a \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks, the U.S. Postal Service announced that it is conducting an evaluation of current operations and potential future uses of its Santa Barbara Processing and Distribution Center (P&DC) facility in Goleta CA.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

Public input will be considered as part of the review. A public meeting will be held to share the initial results of the study and to allow members of the local community to provide their additional feedback and perspectives on the Initial Findings of the MPFR. The meeting will be held on Tuesday, March 26, at 6:00 PM at the Leta Santa Barbara Goleta, 5650 Calle Real, Goleta, CA 93117. A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

Members of the local community may submit comments at:
<https://www.surveymonkey.com/r/mpfr-santa-barbara-ca>.

Below are some preliminary highlights from the study:

Business Case

The Postal Service is investing heavily in operations as it moves to modernize the nation's postal network, improve customer service, and achieve the organization's goal of 95% on-time delivery across all mail products.

The initial results of the facility review support the business case for keeping the Santa Barbara P&DC open and modernizing the facility as a Local Processing Center (LPC) with simplified processes and standardized layouts. The Santa Barbara LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. The facility will offer expanded and streamlined package processing capabilities in the local market and new workplace amenities for USPS employees. Additionally, the business case supports transferring some mail processing operations to the Santa Clarita P&DC.

Future of Facility

The Santa Barbara P&DC will remain open and will be modernized. It will be repositioned as a Local Processing Center for destinating mail processing. It is expected that this facility will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem.

Local Customers

- Retail and other services currently available at the Santa Barbara P&DC will not change.
- Business mail acceptance will remain the same.
- A local postmark will continue to be available at retail post offices.
- Delivery times of mail to residence and businesses should not change throughout this review.

Commercial Mailers

- Mailers who presort mail will continue to receive appropriate postage discounts.
- Mailers who drop ship to Destination Sectional Center Facility (DSCF) can expect no changes if the MPFR is approved.

Stand-Up Talk March 11, 2024

Mail Processing Facility Review Public Meeting to be held re: Santa Barbara P&DC

On January 10, we shared that we were beginning an evaluation of current operations and potential future uses for this facility. This review is part of our 10-year strategic Delivering for America plan and our \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

The initial results of the facility review support the business case for keeping this facility open and modernized as a Local Processing Center (LPC). Repurposing this facility as a Local Processing Center is consistent with the broader network redesign outlined in the DFA Plan. Santa Barbara LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. It will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

Additionally, the business case supports transferring some mail processing operations to the Santa Clarita P&DC in Santa Clarita CA. This will mean, a significant percentage of the mail collected here will travel across our wider transportation and processing network over significant distances to reach their final destinations in a more efficient manner. Mail and packages destined for outside our local area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.

As updates are made to the facility and its operations, there will be no career employee layoffs.

The Postal Service will hold a public meeting to allow the local community to provide their feedback and perspectives on the Initial Findings of the review on Tuesday, March 26, at 6:00 PM at the Leta Santa Barbara Goleta, 5650 Calle Real, Goleta, CA 93117. Attendance will be voluntary and off-the-clock for employees who choose to attend.

Comments on the proposal from employees and the public will be considered before any decision is made. Comments may be submitted at <https://www.surveymonkey.com/r/mpfr-santa-barbara-ca>. You can submit your comments on the study up to 15 days after the public meeting.

Thank you for your attention. We will keep you updated as we move through the facility review process and additional initiatives to modernize our postal network.

MAIL PROCESSING FACILITY REVIEW FREQUENTLY ASKED QUESTIONS

1. Why is USPS conducting a review of this facility?

This review is part of a \$40 billion investment strategy to upgrade and improve processing, transportation, delivery networks and employee experiences across the country. The Santa Barbara Processing and Distribution Center (P&DC) facility has been selected as a candidate for evaluation of its current operations and potential future uses that may lead to overall modernization and enhancement initiatives at the facility.

The review will not result in this facility's closure or career employee layoffs.

2. What did the MPFR evaluate?

In connection with the review, the Postal Service evaluated the following:

- a. Whether efficiency could be increased by transferring some mail processing operations currently performed at the Santa Barbara P&DC to the Santa Clarita P&DC. A significant percentage of the mail collected in Santa Barbara will travel across our wider transportation and processing network over significant distances to reach their final destinations. Mail and packages destined for outside the Santa Barbara area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.
- b. Whether efficiency can be increased, and service improved, regardless of any determination to transfer some mail processing operations out of the Santa Barbara facility, by investing in the Santa Barbara facility to redesign mail processing operations to accommodate changing mail products and mail flow with modern operating strategies, equipment, and improved employee amenities.
- c. Whether efficiency can be improved and/or service enhanced, regardless of any determination to transfer some mail processing operations out of the Santa Barbara facility, by expanding operations at the facility including adding Sorting & Delivery Center functions currently being deployed throughout the nation, incorporating expanded retail functions currently being evaluated and deployed throughout the nation, and/or increasing local package delivery functions including local transportation initiatives supporting new products being introduced.

3. When will a final decision be announced?

The Postal Service anticipates communicating initial findings in the coming month or two.

4. What does the facility review mean for local employees?

The review will not result in career employee layoffs. Our DFA plan is focused on improving the workplace experience for all employees by investing in facility conditions – including better

space and lighting. Throughout the review process, we will continue to communicate regularly with the unions and management associations to support local employees as appropriate.

5. How can the public provide input in the process?

Members of the local community may provide feedback and perspectives on the Initial Findings of the MPFR at a public meeting to be held on Tuesday, March 26, 6:00 PM at the Leta Santa Barbara Goleta, 5650 Calle Real, Goleta, CA 93117 or submit comments at <https://www.surveymonkey.com/r/mpfr-santa-barbara-ca>. A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

6. How will local Post Office or retail operations be impacted by the review process?

The purpose of conducting this review and implementing our 10-year strategic plan is to improve service delivery and our overall retail experience. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will not slow down as a result of this review.

7. What would repurposing this facility look like?

While it may be determined that moving some mail processing operations from this facility is a good business decision, it is highly likely under those circumstances that the facility will be modernized and repurposed as a Local Processing Center, a Sorting & Delivery Center, or both, consistent with the broader network redesign outlined in the DFA Plan. Any such repurposing will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

8. What is a Local Processing Center (LPC)?

Local Processing Centers are critical nodes in our new end-to-end network model. They are the connective node between Regional Processing & Distribution Centers (RPDCs) to Sorting & Delivery Centers – and will ensure a streamlined flow of mail and packages in a logical and integrated manner. As an LPC, the facility amenities – including lighting, space, and bathrooms – would be improved.

9. What is a Sorting & Delivery Center (S&DC)?

Within a region, S&DCs will expand our network reach. S&DCs will aggregate delivery units into fewer, larger, and centrally located sites to provide faster and more reliable mail and package delivery over a greater geographic area, as compared to traditional delivery units.

As with RPDCs, S&DCs will be repurposed existing facilities as well as new buildings. In each S&DC, we will install package sorting equipment to reduce manual handlings and improve throughput. Employee amenities such as lighting, bathrooms, and breakrooms, will also be improved.

We have opened 31 S&DCs since the DFA plan launched. We plan to open another 36 in coming months.

10. What are the long-term benefits of implementing the Delivering for America Plan and modernizing the postal network?

There are many benefits derived from realizing the Delivering for America 10-year Plan. Implementation of the plan will lead to a better everything including better service performance for our customers; better employee morale and retention rates; better facility conditions; a better carbon footprint; better sequencing of mail and packages; better opportunities for our customers to reach a larger population in less time, and overall, a better customer experience.

Mail Processing Facility Review Notice of Public Input Meeting

North Platte P&DC in North Platte NE to Denver P&DC in Denver CO

Mar 11, 2024

As part of a \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks, the U.S. Postal Service announced that it is conducting an evaluation of current operations and potential future uses of its North Platte Processing and Distribution Center (P&DC) facility in North Platte NE.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

Public input will be considered as part of the review. A public meeting will be held to share the initial results of the study and to allow members of the local community to provide their additional feedback and perspectives on the Initial Findings of the MPFR. The meeting will be held on Thursday, March 28, at 6:00 PM at the Sandhills Convention Center, 2102 S Jeffers St, North Platte NE 69101. A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

Members of the local community may submit comments at:
<https://www.surveymonkey.com/r/mpfr-north-platte-ne>.

Below are some preliminary highlights from the study:

Business Case

The Postal Service is investing heavily in operations as it moves to modernize the nation's postal network, improve customer service, and achieve the organization's goal of 95% on-time delivery across all mail products.

The initial results of the facility review support the business case for keeping the North Platte P&DC open and modernizing the facility as a Local Processing Center (LPC) with simplified processes and standardized layouts. The North Platte LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. The facility will offer expanded and streamlined package processing capabilities in the local market and new workplace amenities for USPS employees. Additionally, the business case supports transferring some mail processing operations to the Denver P&DC.

Future of Facility

The North Platte P&DC will remain open and will be modernized. It will be repositioned as a Local Processing Center for destinating mail processing. It is expected that this facility will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem.

Local Customers

- Retail and other services currently available at the North Platte P&DC will not change.
- Business mail acceptance will remain the same.
- A local postmark will continue to be available at retail post offices.
- Delivery times of mail to residence and businesses should not change throughout this review.

Commercial Mailers

- Mailers who presort mail will continue to receive appropriate postage discounts.
- Mailers who drop ship to Destination Sectional Center Facility (DSCF) can expect no changes if the MPFR is approved.

Please go to <https://www.surveymonkey.com/r/mpfr-north-platte-ne> to submit written comments. All written comments must be received by April 12, 2024.

USPS Proposes Improvements to Mail Operations at North Platte Processing Facility

Facility to remain open and modernized as a Local Processing Center to improve mail and package flow through the region

Investments part of USPS 10-year Delivering for America plan to modernize the nation's aging postal network

Public meeting to be held Mar. 28

NORTH PLATTE NE — As part of a \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks, the U.S. Postal Service is conducting an evaluation of current operations and potential future uses of its North Platte Processing and Distribution Center (P&DC) facility in North Platte NE.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

The initial results of the facility review support the business case for keeping the North Platte facility open and modernizing the facility as a Local Processing Center (LPC). The North Platte LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. The facility will offer expanded and streamlined package processing capabilities in the local market and new workplace amenities for USPS employees – part of the Postal Service's \$40 billion investment in the nation's aging postal network.

Additionally, the business case supports transferring some mail processing operations to the Denver P&DC in Denver CO. This would mean a significant percentage of the mail collected locally will travel across the wider USPS transportation and processing network over significant distances to reach their final destinations in a more efficient manner. Mail and packages destined for outside the local area may receive better service and be more cost effectively distributed by aggregating it with mail and packages

from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.

A public meeting will be held on Thursday, March 28, at 6:00 PM at the Sandhills Convention Center, 2102 S Jeffers St, North Platte NE 69101. USPS will share the initial results of the study and allow members of the community to provide additional oral feedback and perspectives on the Initial Findings of the MPFR. A summary of the MPFR will be posted on about.usps.com at least one week prior to public input meeting.

Members of the local community may submit written comments at <https://www.surveymonkey.com/r/mpfr-north-platte-ne> through Apr. 12, 2024. The public's input will be considered prior to a final decision.

The Postal Service will work closely with its unions and management associations throughout the facility review and will continually monitor the impact of any changes that are implemented and will adjust plans as necessary and appropriate.

Thank you for your attention. We will keep you updated as we move through the facility review process and additional initiatives to modernize our postal network.

MAIL PROCESSING FACILITY REVIEW FREQUENTLY ASKED QUESTIONS

1. Why is USPS conducting a review of this facility?

This review is part of a \$40 billion investment strategy to upgrade and improve processing, transportation, delivery networks and employee experiences across the country. The North Platte Processing and Distribution Center (P&DC) facility has been selected as a candidate for evaluation of its current operations and potential future uses that may lead to overall modernization and enhancement initiatives at the facility.

The review will not result in this facility's closure or career employee layoffs.

2. What did the MPFR evaluate?

In connection with the review, the Postal Service evaluated the following:

- a. Whether efficiency could be increased by transferring some mail processing operations currently performed at the North Platte P&DC to the Denver P&DC. A significant percentage of the mail collected in North Platte will travel across our wider transportation and processing network over significant distances to reach their final destinations. Mail and packages destined for outside the North Platte area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.
- b. Whether efficiency can be increased, and service improved, regardless of any determination to transfer some mail processing operations out of the North Platte facility, by investing in the North Platte facility to redesign mail processing operations to accommodate changing mail products and mail flow with modern operating strategies, equipment, and improved employee amenities.
- c. Whether efficiency can be improved and/or service enhanced, regardless of any determination to transfer some mail processing operations out of the North Platte facility, by expanding operations at the facility including adding Sorting & Delivery Center functions currently being deployed throughout the nation, incorporating expanded retail functions currently being evaluated and deployed throughout the nation, and/or increasing local package delivery functions including local transportation initiatives supporting new products being introduced.

3. When will a final decision be announced?

The Postal Service anticipates communicating initial findings in the coming month or two.

4. What does the facility review mean for local employees?

The review will not result in career employee layoffs. Our DFA plan is focused on improving the workplace experience for all employees by investing in facility conditions – including better space and lighting. Throughout the review process, we will continue to communicate regularly with the unions and management associations to support local employees as appropriate.

5. How can the public provide input in the process?

Members of the local community may provide feedback and perspectives on the Initial Findings of the MPFR at a public meeting to be held on Thursday, March 28, 6:00 PM at the Sandhills Convention Center, 2102 S Jeffers St, North Platte NE 69101 or submit comments at <https://www.surveymonkey.com/r/mpfr-north-platte-ne>. A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

6. How will local Post Office or retail operations be impacted by the review process?

The purpose of conducting this review and implementing our 10-year strategic plan is to improve service delivery and our overall retail experience. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will not slow down as a result of this review.

7. What would repurposing this facility look like?

While it may be determined that moving some mail processing operations from this facility is a good business decision, it is highly likely under those circumstances that the facility will be modernized and repurposed as a Local Processing Center, a Sorting & Delivery Center, or both, consistent with the broader network redesign outlined in the DFA Plan. Any such repurposing will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

8. What is a Local Processing Center (LPC)?

Local Processing Centers are critical nodes in our new end-to-end network model. They are the connective node between Regional Processing & Distribution Centers (RPDCs) to Sorting & Delivery Centers – and will ensure a streamlined flow of mail and packages in a logical and integrated manner. As an LPC, the facility amenities – including lighting, space, and bathrooms – would be improved.

9. What is a Sorting & Delivery Center (S&DC)?

Within a region, S&DCs will expand our network reach. S&DCs will aggregate delivery units into fewer, larger, and centrally located sites to provide faster and more reliable mail and package delivery over a greater geographic area, as compared to traditional delivery units.

As with RPDCs, S&DCs will be repurposed existing facilities as well as new buildings. In each S&DC, we will install package sorting equipment to reduce manual handlings and improve throughput. Employee amenities such as lighting, bathrooms, and breakrooms, will also be improved.

We have opened 31 S&DCs since the DFA plan launched. We plan to open another 36 in coming months.

10. What are the long-term benefits of implementing the Delivering for America Plan and modernizing the postal network?

There are many benefits derived from realizing the Delivering for America 10-year Plan. Implementation of the plan will lead to a better everything including better service performance for our customers; better employee morale and retention rates; better facility conditions; a better carbon footprint; better sequencing of mail and packages; better opportunities for our customers to reach a larger population in less time, and overall, a better customer experience.

Mail Processing Facility Review Notice of Public Input Meeting

McAllen P&DC in McAllen TX to San Antonio P&DC in San Antonio TX

March 11, 2024

As part of a \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks, the U.S. Postal Service announced that it is conducting an evaluation of current operations and potential future uses of its McAllen Processing and Distribution Center (P&DC) facility in McAllen TX.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. **The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.**

Public input will be considered as part of the review. A public meeting will be held to share the initial results of the study and to allow members of the local community to provide their feedback and perspectives on the Initial Findings of the MPFR. The meeting will be held on Tuesday, March 26, at 4:30 PM at the McAllen Main Library - Meeting Center Auditorium, 4001 N 23rd St, McAllen TX 78504. A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

Members of the local community may submit comments at:
<https://www.surveymonkey.com/r/mpfr-mcallen-tx>.

Below are some preliminary highlights from the study:

Business Case

The Postal Service is investing heavily in operations as it moves to modernize the nation's postal network, improve customer service, and achieve the organization's goal of 95% on-time delivery across all mail products.

The initial results of the facility review support the business case for keeping the McAllen P&DC open and modernizing the facility as a Local Processing Center (LPC) with simplified processes and standardized layouts. The McAllen LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. The facility will offer expanded and streamlined package processing capabilities in the local market and new workplace amenities for USPS employees. Stand-Up Talk March 11, 2024

Mail Processing Facility Review Public Meeting to be held re: McAllen P&DC

On January 10, we shared that we were beginning an evaluation of current operations and potential future uses for this facility. This review is part of our 10-year strategic Delivering for America plan and our \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

The initial results of the facility review support the business case for keeping this facility open and modernized as a Local Processing Center (LPC). Repurposing this facility as a Local Processing Center is consistent with the broader network redesign outlined in the DFA Plan. The McAllen LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. It will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

Additionally, the business case supports transferring some mail processing operations to the San Antonio P&DC in San Antonio, TX. This will mean, a significant percentage of the mail collected here will travel across our wider transportation and processing network over significant distances to reach their final destinations in a more efficient manner. Mail and packages destined for outside our local area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.

As updates are made to the facility and its operations, there will be no career employee layoffs.

The Postal Service will hold a public meeting to allow the local community to provide their feedback and perspectives on the Initial Findings of the review on Tuesday, March 26, at 4:30 PM at the McAllen Main Library - Meeting Center Auditorium, 4001 N 23rd St, McAllen TX 78504. Attendance will be voluntary and off-the-clock for employees who choose to attend.

Comments on the proposal from employees and the public will be considered before any decision is made. Comments may be submitted at <https://www.surveymonkey.com/r/mpfr-mcallen-tx>. You can submit your comments on the study up to 15 days after the public meeting.

Thank you for your attention. We will keep you updated as we move through the facility review process and additional initiatives to modernize our postal network.

MAIL PROCESSING FACILITY REVIEW FREQUENTLY ASKED QUESTIONS

1. Why is USPS conducting a review of this facility?

This review is part of a \$40 billion investment strategy to upgrade and improve processing, transportation, delivery networks and employee experiences across the country. The McAllen Processing and Distribution Center (P&DC) facility has been selected as a candidate for evaluation of its current operations and potential future uses that may lead to overall modernization and enhancement initiatives at the facility.

The review will not result in this facility's closure or career employee layoffs.

2. What did the MPFR evaluate?

In connection with the review, the Postal Service evaluated the following:

- a. Whether efficiency could be increased by transferring some mail processing operations currently performed at the McAllen P&DC to the San Antonio P&DC. A significant percentage of the mail collected in McAllen will travel across our wider transportation and processing network over significant distances to reach their final destinations. Mail and packages destined for outside the McAllen area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.
- b. Whether efficiency can be increased, and service improved, regardless of any determination to transfer some mail processing operations out of the McAllen facility, by investing in the McAllen facility to redesign mail processing operations to accommodate changing mail products and mail flow with modern operating strategies, equipment, and improved employee amenities.
- c. Whether efficiency can be improved and/or service enhanced, regardless of any determination to transfer some mail processing operations out of the McAllen facility, by expanding operations at the facility including adding Sorting & Delivery Center functions currently being deployed throughout the nation, incorporating expanded retail functions currently being evaluated and deployed throughout the nation, and/or increasing local package delivery functions including local transportation initiatives supporting new products being introduced.

3. When will a final decision be announced?

The Postal Service anticipates communicating initial findings in the coming month or two.

4. What does the facility review mean for local employees?

The review will not result in career employee layoffs. Our DFA plan is focused on improving the workplace experience for all employees by investing in facility conditions – including better space and lighting. Throughout the review process, we will continue to communicate regularly with the unions and management associations to support local employees as appropriate.

5. How can the public provide input in the process?

Members of the local community may provide feedback and perspectives on the Initial Findings of the MPFR at a public meeting to be held on Tuesday, March 26, 4:30 PM at the McAllen Main Library - Meeting Center Auditorium, 4001 N 23rd St, McAllen TX 78504, or submit comments at <https://www.surveymonkey.com/r/mpfr-mcallen-tx>. A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

6. How will local Post Office or retail operations be impacted by the review process?

The purpose of conducting this review and implementing our 10-year strategic plan is to improve service delivery and our overall retail experience. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will not slow down as a result of this review.

7. What would repurposing this facility look like?

While it may be determined that moving some mail processing operations from this facility is a good business decision, it is highly likely under those circumstances that the facility will be modernized and repurposed as a Local Processing Center, a Sorting & Delivery Center, or both, consistent with the broader network redesign outlined in the DFA Plan. Any such repurposing will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

8. What is a Local Processing Center (LPC)?

Local Processing Centers are critical nodes in our new end-to-end network model. They are the connective node between Regional Processing & Distribution Centers (RPDCs) to Sorting & Delivery Centers – and will ensure a streamlined flow of mail and packages in a logical and integrated manner. As an LPC, the facility amenities – including lighting, space, and bathrooms – would be improved.

9. What is a Sorting & Delivery Center (S&DC)?

Within a region, S&DCs will expand our network reach. S&DCs will aggregate delivery units into fewer, larger, and centrally located sites to provide faster and more reliable mail and package delivery over a greater geographic area, as compared to traditional delivery units.

As with RPDCs, S&DCs will be repurposed existing facilities as well as new buildings. In each S&DC, we will install package sorting equipment to reduce manual handlings and improve throughput. Employee amenities such as lighting, bathrooms, and breakrooms, will also be improved.

We have opened 31 S&DCs since the DFA plan launched. We plan to open another 36 in coming months.

10. What are the long-term benefits of implementing the Delivering for America Plan and modernizing the postal network?

There are many benefits derived from realizing the Delivering for America 10-year Plan. Implementation of the plan will lead to a better everything including better service performance for our customers; better employee morale and retention rates; better facility conditions; a better carbon footprint; better sequencing of mail and packages; better opportunities for our customers to reach a larger population in less time, and overall, a better customer experience.

Mail Processing Facility Review Notice of Public Input Meeting

White River Junction P&DC in White River Junction VT to Hartford P&DC in Hartford CT

March 11, 2024

As part of a \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks, the U.S. Postal Service announced that it is conducting an evaluation of current operations and potential future uses of its White River Junction Processing and Distribution Center (P&DC) facility in White River Junction, VT.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

Public input will be considered as part of the review. A public meeting will be held to share the initial results of the study and to allow members of the local community to provide their feedback and perspectives on the Initial Findings of the MPFR. The meeting will be held on Tuesday, March 26, at 6:00 PM at the Hilton Garden Inn Hanover/Lebanon, 35 Labombard Rd, Lebanon, NH 03766. A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

Members of the local community may submit comments at: <https://www.surveymonkey.com/r/mpfr-white-river-junction-vt>.

Below are some preliminary highlights from the study:

Business Case

The Postal Service is investing heavily in operations as it moves to modernize the nation's postal network, improve customer service, and achieve the organization's goal of 95% on-time delivery across all mail products.

The initial results of the facility review support the business case for keeping the White River Junction P&DC open and modernizing the facility as a Local Processing Center (LPC) with simplified processes and standardized layouts. The White River Junction LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. The facility will offer expanded and streamlined package processing capabilities in the local market and new workplace amenities for USPS employees. Additionally, the business case supports transferring some mail processing operations to the Hartford P&DC in Hartford CT.

Future of Facility

The White River Junction P&DC will remain open and will be modernized. It will be repositioned as a Local Processing Center for destinating mail processing. It is expected that this facility will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem.

Local Customers

- Retail and other services currently available at the White River Junction P&DC will not change.
- Business mail acceptance will remain the same.
- A local postmark will continue to be available at retail post offices.
- Delivery times of mail to residence and businesses should not change throughout this review.

Commercial Mailers

- Mailers who presort mail will continue to receive appropriate postage discounts.
- Mailers who drop ship to Destination Sectional Center Facility (DSCF) can expect no changes if the MPFR is approved.

Please go to <https://www.surveymonkey.com/r/mpfr-white-river-junction-vt> to submit written comments. All written comments must be received by April 10, 2024.

USPS Proposes Improvements to Mail Operations at White River Junction Processing Facility

Facility to remain open and modernized as a Local Processing Center to improve mail and package flow through the region

Investments part of USPS 10-year Delivering for America plan to modernize the nation's aging postal network

Public meeting to be held Mar. 26

WHITE RIVER JUNCTION VT — As part of a \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks, the U.S. Postal Service is conducting an evaluation of current operations and potential future uses of its White River Junction Processing and Distribution Center (P&DC) facility in White River Junction. VT.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. **The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.**

The initial results of the facility review support the business case for keeping the White River Junction facility open and modernizing the facility as a Local Processing Center (LPC). The White River Junction LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. The facility will offer expanded and streamlined package processing capabilities in the local market and new workplace amenities for USPS employees – part of the Postal Service's \$40 billion investment in the nation's aging postal network.

Additionally, the business case supports transferring some mail processing operations to the White River Junction P&DC in White River Junction. VT. This would mean a significant percentage of the mail collected locally will travel across the wider USPS transportation and processing network over significant distances to reach their final destinations in a more efficient manner. Mail and packages destined for outside the local area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.

A public meeting will be held on Tuesday, Mar. 26, at 6:00 PM at the Hilton Garden Inn Hanover/Lebanon, 35 Labombard Rd, Lebanon, NH 03766. USPS will share the initial results of the study and allow members of the community to provide oral feedback and perspectives on the Initial Findings of the MPFR. A summary of the MPFR will be posted on about.usps.com at least one week prior to public input meeting.

Members of the local community may submit written comments at <https://www.surveymonkey.com/r/mpfr-white-river-junction-vt> through Apr. 10, 2024. The public's input will be considered prior to a final decision.

The Postal Service will work closely with its unions and management associations throughout the facility review and will continually monitor the impact of any changes that are implemented and will adjust plans as necessary and appropriate.

###

Please Note: The United States Postal Service is an independent federal establishment, mandated to be self-financing and to serve every American community through the affordable, reliable and secure delivery of mail and packages to 167 million addresses six and often seven days a week. Overseen by a bipartisan Board of Governors, the Postal Service is implementing a 10-year transformation plan, [Delivering for America](#), to modernize the postal network, restore long-term financial sustainability, dramatically improve service across all mail and shipping categories, and maintain the organization as one of America's most valued and trusted brands.

The Postal Service generally receives no tax dollars for operating expenses and relies on the sale of postage, products and services to fund its operations.

Thank you for your attention. We will keep you updated as we move through the facility review process and additional initiatives to modernize our postal network.

MAIL PROCESSING FACILITY REVIEW FREQUENTLY ASKED QUESTIONS

1. Why is USPS conducting a review of this facility?

This review is part of a \$40 billion investment strategy to upgrade and improve processing, transportation, delivery networks and employee experiences across the country. The White River Junction Processing and Distribution Center (P&DC) facility has been selected as a candidate for evaluation of its current operations and potential future uses that may lead to overall modernization and enhancement initiatives at the facility.

The review will not result in this facility's closure or career employee layoffs.

2. What did the MPFR evaluate?

In connection with the review, the Postal Service evaluated the following:

- a. Whether efficiency could be increased by transferring some mail processing operations currently performed at the White River Junction P&DC to the Hartford P&DC. A significant percentage of the mail collected in White River Junction will travel across our wider transportation and processing network over significant distances to reach their final destinations. Mail and packages destined for outside the White River Junction area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.
- b. Whether efficiency can be increased, and service improved, regardless of any determination to transfer some mail processing operations out of the White River Junction facility, by investing in the White River Junction facility to redesign mail processing operations to accommodate changing mail products and mail flow with modern operating strategies, equipment, and improved employee amenities.
- c. Whether efficiency can be improved and/or service enhanced, regardless of any determination to transfer some mail processing operations out of the White River Junction facility, by expanding operations at the facility including adding Sorting & Delivery Center functions currently being deployed throughout the nation, incorporating expanded retail functions currently being evaluated and deployed throughout the nation, and/or increasing local package delivery functions including local transportation initiatives supporting new products being introduced.

3. When will a final decision be announced?

The Postal Service anticipates communicating initial findings in the coming month or two.

4. What does the facility review mean for local employees?

The review will not result in career employee layoffs. Our DFA plan is focused on improving the workplace experience for all employees by investing in facility conditions – including better

space and lighting. Throughout the review process, we will continue to communicate regularly with the unions and management associations to support local employees as appropriate.

5. How can the public provide input in the process?

Members of the local community may provide feedback and perspectives on the Initial Findings of the MPFR at a public meeting to be held on Tuesday, March 26, 6:00 PM at the Hilton Garden Inn Hanover/Lebanon, 35 Labombard Rd, Lebanon, NH 03766, or submit comments at <https://www.surveymonkey.com/r/mpfr-white-river-junction-vt> . A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

6. How will local Post Office or retail operations be impacted by the review process?

The purpose of conducting this review and implementing our 10-year strategic plan is to improve service delivery and our overall retail experience. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will not slow down as a result of this review.

7. What would repurposing this facility look like?

While it may be determined that moving some mail processing operations from this facility is a good business decision, it is highly likely under those circumstances that the facility will be modernized and repurposed as a Local Processing Center, a Sorting & Delivery Center, or both, consistent with the broader network redesign outlined in the DFA Plan. Any such repurposing will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

8. What is a Local Processing Center (LPC)?

Local Processing Centers are critical nodes in our new end-to-end network model. They are the connective node between Regional Processing & Distribution Centers (RPDCs) to Sorting & Delivery Centers – and will ensure a streamlined flow of mail and packages in a logical and integrated manner. As an LPC, the facility amenities – including lighting, space, and bathrooms – would be improved.

9. What is a Sorting & Delivery Center (S&DC)?

Within a region, S&DCs will expand our network reach. S&DCs will aggregate delivery units into fewer, larger, and centrally located sites to provide faster and more reliable mail and package delivery over a greater geographic area, as compared to traditional delivery units.

As with RPDCs, S&DCs will be repurposed existing facilities as well as new buildings. In each S&DC, we will install package sorting equipment to reduce manual handlings and improve throughput. Employee amenities such as lighting, bathrooms, and breakrooms, will also be improved.

We have opened 31 S&DCs since the DFA plan launched. We plan to open another 36 in coming months.

10. What are the long-term benefits of implementing the Delivering for America Plan and modernizing the postal network?

There are many benefits derived from realizing the Delivering for America 10-year Plan. USPS Proposes Improvements to Mail Operations at Waterloo Processing Facility

Facility to remain open and modernized as a Local Processing Center to improve mail and package flow through the region

Investments part of USPS 10-year Delivering for America plan to modernize the nation's aging postal network

Public meeting to be held Mar. 26

WATERLOO, IA — As part of a \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks, the U.S. Postal Service is conducting an evaluation of current operations and potential future uses of its Waterloo Processing and Distribution Center (P&DC) facility in Waterloo, IA.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

The initial results of the facility review support the business case for keeping the Waterloo facility open and modernizing the facility as a Local Processing Center (LPC). The Waterloo LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. The facility will offer expanded and streamlined package processing capabilities in the local market and new workplace amenities for USPS employees — part of the Postal Service's \$40 billion investment in the nation's aging postal network.

Additionally, the business case supports transferring some mail processing operations to the Des Moines P&DC in Des Moines, IA. This would mean a significant percentage of the mail collected locally will travel across the wider USPS transportation and processing network over significant distances to reach their final destinations in a more efficient manner. Mail and packages destined for outside the local area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.

A public meeting will be held on Tuesday, Mar. 26, at 2:00 PM at the Cedar Falls Public Library, 524 Main Street, Cedar Falls, IA 50613. USPS will share the initial results of the study and allow members of the community to provide oral feedback and perspectives on the Initial Findings of the MPFR. Stand-Up Talk March 11, 2024

Mail Processing Facility Review Public Meeting to be held re: Waterloo P&DC

On January 10, we shared that we were beginning an evaluation of current operations and potential future uses for this facility. This review is part of our 10-year strategic Delivering for America plan and our \$40 billion investment strategy to upgrade and improve the Postal processing, transportation, and delivery networks.

The USPS ten-year Delivering for America (DFA) plan includes initiatives to improve organizational and operational processes and actively make the Postal Service an efficient, high-performing, world class logistics and delivery provider. Improvements to Postal operations will enhance the level of service provided to the public; drive innovation and enable a broader array of postal products and services; enhance organizational competitiveness; improve efficiency and lower the cost to operate; and provide better workplaces and careers for Postal Service employees.

This specific facility review will inform the best allocation of resources and strategies to improve customer service and to achieve significant cost savings through operational precision and efficiency. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will be unaffected throughout this review. The evaluation is a first step in the Postal Service review and investment process in this facility and will not result in this facility's closure or career employee layoffs.

The initial results of the facility review support the business case for keeping this facility open and modernized as a Local Processing Center (LPC). Repurposing this facility as a Local Processing Center is consistent with the broader network redesign outlined in the DFA Plan. The Waterloo LPC will be a critical node to the unified movement of mail and packages across the regional processing and transportation ecosystem. It will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

Additionally, the business case supports transferring some mail processing operations to the Des Moines P&DC in Des Moines, IA. This will mean, a significant percentage of the mail collected here will travel across our wider transportation and processing network over significant distances to reach their final destinations in a more efficient manner. Mail and packages destined for outside our local area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.

As updates are made to the facility and its operations, there will be no career employee layoffs.

The Postal Service will hold a public meeting to allow the local community to provide their feedback and perspectives on the Initial Findings of the review on Tuesday, March 26, at 2:00 PM at the Cedar Falls Public Library, 524 Main Street, Cedar Falls, IA 50613. Attendance will be voluntary and off-the-clock for employees who choose to attend.

Comments on the proposal from employees and the public will be considered before any decision is made. Comments may be submitted at <https://www.surveymonkey.com/r/mpfr-waterloo-ia>. You can submit your comments on the study up to 15 days after the public meeting.

Thank you for your attention. We will keep you updated as we move through the facility review process and additional initiatives to modernize our postal network.

MAIL PROCESSING FACILITY REVIEW FREQUENTLY ASKED QUESTIONS

1. Why is USPS conducting a review of this facility?

This review is part of a \$40 billion investment strategy to upgrade and improve processing, transportation, delivery networks and employee experiences across the country. The Waterloo Processing and Distribution Center (P&DC) facility has been selected as a candidate for evaluation of its current operations and potential future uses that may lead to overall modernization and enhancement initiatives at the facility.

The review will not result in this facility's closure or career employee layoffs.

2. What did the MPFR evaluate?

In connection with the review, the Postal Service evaluated the following:

- a. Whether efficiency could be increased by transferring some mail processing operations currently performed at the Waterloo P&DC to the Des Moines P&DC. A significant percentage of the mail collected in Waterloo will travel across our wider transportation and processing network over significant distances to reach their final destinations. Mail and packages destined for outside the Waterloo area may receive better service and be more cost effectively distributed by aggregating it with mail and packages from other areas going to the same places that will likewise utilize the wider postal network and be transported significant distances from where the mail originated.
- b. Whether efficiency can be increased, and service improved, regardless of any determination to transfer some mail processing operations out of the Waterloo facility, by investing in the Waterloo facility to redesign mail processing operations to accommodate changing mail products and mail flow with modern operating strategies, equipment, and improved employee amenities.
- c. Whether efficiency can be improved and/or service enhanced, regardless of any determination to transfer some mail processing operations out of the Waterloo facility, by expanding operations at the facility including adding Sorting & Delivery Center functions currently being deployed throughout the nation, incorporating expanded retail functions currently being evaluated and deployed throughout the nation, and/or increasing local package delivery functions including local transportation initiatives supporting new products being introduced.

3. When will a final decision be announced?

The Postal Service anticipates communicating initial findings in the coming month or two.

4. What does the facility review mean for local employees?

The review will not result in career employee layoffs. Our DFA plan is focused on improving the workplace experience for all employees by investing in facility conditions – including better space and lighting. Throughout the review process, we will continue to communicate regularly with the unions and management associations to support local employees as appropriate.

5. How can the public provide input in the process?

Members of the local community may provide feedback and perspectives on the Initial Findings of the MPFR at a public meeting to be held on Tuesday, March 26, 2:00 PM at the Cedar Falls Public Library, 524 Main Street, Cedar Falls, IA 50613, or submit comments at <https://www.surveymonkey.com/r/mpfr-waterloo-ia>. A summary of the MPFR will be posted on *about.usps.com* at least one week prior to the public input meeting.

6. How will local Post Office or retail operations be impacted by the review process?

The purpose of conducting this review and implementing our 10-year strategic plan is to improve service delivery and our overall retail experience. Business mail entry, Post Office, station, and branch retail services are not expected to change, and delivery services will not slow down as a result of this review.

7. What would repurposing this facility look like?

While it may be determined that moving some mail processing operations from this facility is a good business decision, it is highly likely under those circumstances that the facility will be modernized and repurposed as a Local Processing Center, a Sorting & Delivery Center, or both, consistent with the broader network redesign outlined in the DFA Plan. Any such repurposing will result in a revitalized, modernized, and upgraded facility with improved employee amenities and a better working environment.

8. What is a Local Processing Center (LPC)?

Local Processing Centers are critical nodes in our new end-to-end network model. They are the connective node between Regional Processing & Distribution Centers (RPDCs) to Sorting & Delivery Centers – and will ensure a streamlined flow of mail and packages in a logical and integrated manner. As an LPC, the facility amenities – including lighting, space, and bathrooms – would be improved.

9. What is a Sorting & Delivery Center (S&DC)?

Within a region, S&DCs will expand our network reach. S&DCs will aggregate delivery units into fewer, larger, and centrally located sites to provide faster and more reliable mail and package delivery over a greater geographic area, as compared to traditional delivery units.

As with RPDCs, S&DCs will be repurposed existing facilities as well as new buildings. In each S&DC, we will install package sorting equipment to reduce manual handlings and improve throughput. Employee amenities such as lighting, bathrooms, and breakrooms, will also be improved.

We have opened 31 S&DCs since the DFA plan launched. We plan to open another 36 in coming months.

10. What are the long-term benefits of implementing the Delivering for America Plan and modernizing the postal network?

There are many benefits derived from realizing the Delivering for America 10-year Plan. Implementation of the plan will lead to a better everything including better service performance for our customers; better employee morale and retention rates; better facility conditions; a better carbon footprint; better sequencing of mail and packages; better opportunities for our customers to reach a larger population in less time, and overall, a better customer experience.
