LABOR RELATIONS

June 7, 2022

Mr. Ivan Butts
National President
National Association of Postal Supervisors
1727 King Street, Suite 400
Alexandria, VA 22314-2753

Dear Ivan:

This is in reference to the September 21, 2021, general interest notification letter that was sent to you relating to the installation of WebCam devices in various installations and P&DC facilities to monitor/view mail conditions and the status of mail processing operations. Additionally, existing closed-circuit television (CCTV) cameras located in some P&DC operations were also being used for the same purpose.

During the 2021 Peak season, there were approximately 75 P&DC installations and 189 post offices where the observation of mail conditions was conducted using WebCam devices.

On March 25, 2022, you were sent subsequent correspondence to advise that the WebCam devices proved to be a valuable tool for evaluating and monitoring overall mail flow conditions on the workroom floor and the use of WebCam devices to monitor operations would be extended. The Postal Service has now made the determination that the use of WebCam devices to monitor mail processing operations in P&DC facilities and post office installations will be continued on a permanent basis.

We are in the process of installing WebCam devices at the Los Angeles P&DC to observe the package processing operations. Moreover, the Postal Service will be installing WebCam devices in 88 additional postal facilities for the 2022 Peak season.

Please find enclosed a list of the 88 additional sites where WebCam devices to monitor mail processing operations will be deployed.

Please contact Bruce Nicholson at extension 7773 if you have questions concerning this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "David E. Mills".

David E. Mills
Director
Labor Relations Policies and Programs
