Board Memo 086-2023: LiteBlue Update

Executive Board,

NAPS HQ has received the following bullet points from yesterday's Zoom meeting regarding LiteBlue

- Due to elevated security threats, we implemented additional device and location security policies in LiteBlue in March 2023.
- These policies monitor user log in activity to detect anomalies associated with known security threats, such as phishing, account takeover, etc.
- Specifically, the additional security policies monitor IP addresses, locations, devices, and time between attempted log ins.
- Ultimately, these policies are designed to safeguard employee account information by blocking attempted log ins from unrecognized devices or locations.

As we continue to receive information on this issue, we will share with NAPS Regional and Area VP's.

Thank you, and be safe.

NAPS Headquarters
