Dear Brian:

As a matter of general interest, the Postal Service plans to expand Surface Visibility (SV) scanning to the Atlanta, Georgia Mail Recovery Center (MRC).

The purpose of this initiative is to support surface visibility for Postal Service customers and improve internal data accuracy and service measurement throughout the Postal Service network.

Clerks at the MRC will use SV scanning devices and related equipment (e.g., printers, software, etc.), to track truck arrivals and departures, as well as, Mail Transport Equipment Labeler (MTEL) placards on equipment for dispatch.

The subject scanning is scheduled to begin in May and training on the SV scanners will be provided prior to use.

If you have any questions, please contact Dion Mealy at extension 6861.

Sincerely,

Rickey R. Dean
Manager
Contract Administration (APWU)

(CA2019-106)
