AUG 24 2020

Mr. Brian J. Wagner
President
National Association of Postal Supervisors
1727 King Street, Suite 400
Alexandria, VA 22314-2753

Dear Brian:

This is in further reference to our June 18, 2019, notice concerning the Postal Service's intent to test video technology in delivery vehicles. The Postal Service will be expanding the testing of LYTX video technology.

The purpose of this phase 2 testing is to further evaluate the feasibility of using video and GPS technology to reduce collisions and assist identify driver risks and the cause of vehicle damage.

Through this expanded testing the Postal Service hopes to identify ways to assist in modifying driver behavior, improve behind-the-wheel performance, and reduce the severity and frequency of motor vehicle mishaps. In addition to reducing incidences, USPS has a goal to improve driver safety, reduce tort claims, exonerate carriers and use this technology as a training and monitoring tool for new carriers as well as those considered to be at higher risk.

To further evaluate this technology the Postal Service is expanding the test to the locations identified on the enclosure. The Districts and sites have been selected based on their current accident and repeat accident rates over the same period last year.

This expansion is scheduled to begin on August 29 and run for approximately 9 months. During this period, participating carriers will operate test vehicles while performing their normal street activities.

Please contact Bruce Nicholson at extension 7773 if you have questions concerning this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "David E. Mills".
