Dear Brian:

As a matter of general interest, Headquarters Engineering Systems has developed an electronic Arrow Lock (eArrow Lock) for use on collection boxes and cluster box units (CBUs).

The eArrow Lock was developed as a solution to the ongoing problem the Postal Service is facing of collection boxes and CBUs being compromised by lost, stolen and counterfeit Arrow Lock keys. The Arrow Lock Key alone will no longer open the collection box or CBU. The employee must open the eArrow Lock application on the Mobile Delivery Device-Technical Refresh (MDD-TR) device, which will communicate with the eArrow Lock on the collection box or the CBU, then use the Arrow Lock Key to open the lock on the collection box or CBU.

Engineering Systems is planning to install and test the eArrow Locks for six months beginning mid-August. A total of 20 collection boxes and 30 CBUs will be utilized for testing in the Northern Virginia area.

Please contact Dion Mealy at 202-507-0193 if you have any questions concerning this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "Shannon Richardson".
