NAPS HEADQUARTERS

Mr. Brian J. Wagner
President
National Association of Postal Supervisors
1727 King Street, Suite 400
Alexandria, VA 22314-2753

Dear Brian:

As a matter of general interest, the Postal Service intends to conduct an employee *Electric Vehicle Charging* pilot. This pilot test will provide data and information to assist the Postal Service in determining the utility and feasibility of deploying electric vehicle chargers for employee use at postal facilities.

The scope of the pilot test will evaluate the following:

- The amount and cost of power required to recharge a vehicle;
- The number of privately-owned electric vehicles that can be charged on a daily basis and for how long;
- The positioning of parking spaces required to safely charge electric vehicles; and
- If employee schedules affect the electric charge station rotation of vehicles.

Employees may volunteer to participate by using the electric charging stations free of charge during the pilot test period. However, if installation of electric charging stations is approved, employees will be expected to pay for charging of their personal vehicles.

The pilot test will be conducted at the Anaheim P&DC facility in Anaheim, CA and is currently scheduled to begin February 1, 2020 through September 30, 2020.

Please contact Bruce Nicholson at extension 7773 if you have questions concerning this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "Mera E. Cole".
