LABOR RELATIONS

June 2, 2021

Mr. Brian J. Wagner
President
National Association of Postal
Supervisors
1727 King Street, Suite 400
Alexandria, VA 22314-2753

Dear Mr. Wagner:

As a matter of general interest, the United States Postal Service is partnering with Aclima, Inc. to conduct Phase 2 of its pilot to continue testing air quality sensors mounted onto Postal delivery vehicles.

The purpose of this pilot is to passively test air pollution with sensors mounted on Postal Service vehicles. Aclima plans to use newly developed proprietary air quality sensors during Phase 2 of this pilot. Under the current agreement, several Postal delivery vehicles will capture air quality data in the neighborhoods served by the Oakland Piedmont Post Office in Oakland, California. The test will evaluate the business potential, costing and work requirements.

Phase 2 of this pilot is tentatively scheduled to begin on June 15 and run for approximately 3 months. During this period, participating carriers will drive test vehicles during the normal delivery of their routes. No carrier information will be collected during the test.

Please contact Bruce Nicholson at extension 7773 if you have questions concerning this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "David E. Mills".
