LABOR RELATIONS

November 5, 2021

Mr. Ivan Butts
President
National Association of Postal
Supervisors
1727 King Street, Suite 400
Alexandria, VA 22314-2753

Dear Mr. Butts:

As a matter of general interest, the Postal Service is working with NVIDIA to test incorporating cameras with Global Positioning System (GPS) into Postal delivery vehicles to capture street imagery. The purpose of the test is to evaluate the street imagery data for its potential to improve the safety of Postal operations. The test will be conducted in the Bailey's Crossroads, VA Post Office, located at 6021 Leesburg Pike, Falls Church, VA 22041.

A two-day test will begin in the next 2 weeks, and then continue in late January/early February 2022 for a 30-day period. During this period, participating carriers will operate USPS delivery vehicles (with the aforementioned devices inside) while performing their normal street duties.

We have included a picture of the device that will be mounted inside the vehicle.

Please contact Bruce Nicholson at extension 7773 if you have questions concerning this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "David E. Mills".
