RECEIVED

MAR 12 2020

Mr. Brian J. Wagner
President
National Association of Postal Supervisors
1727 King Street, Suite 400
Alexandria, VA 22314-2753

Dear Brian:

As a matter of general interest, the Postal Service is updating the Mobile Delivery Device (MDD) to enhance its functionality.

Release 7.1 includes:

- Remove Delivery with Authorized Agent Option
- Vehicle Check - display a message to all carriers to complete the Notice 76 Vehicle Safely Check
- Geo Alert Workflow Update
- Return Receipt Delivery
- Unify MDD Software Build – rural carrier only

National implementation is scheduled for March 23.

We have enclosed the final draft copy of the MDD Release 7.1 Service Talk.

Please contact Bruce Nicholson at extension 7773 if you have questions concerning this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "David E. Mills", with a stylized flourish extending to the right.

David E Mills
A/Manager

Enclosure

MDD Release 7.1 - Carriers

MDD Release R7.1 will be deployed nationwide on 03/16. New features introduced in the release include:

- Remove Delivery with Authorized Agent Option
- Vehicle Check
- Geo Alert Workflow Update
- Return Receipt Delivery
- Unify MDD Software Build

1. Remove Delivery with Authorized Agent Option

Background

PTR has removed the option for a delivery with an Authorized Agent location attribute. Now the scanner can present the user with event code 60 option for a delivery to the agent.

Changes on MDD

MDD has been modified to remove option G. Authorized Agent (event 01, attribute 23 AND event 13) and will no longer send PTR the event 01 with attribute 23 AND event 13.

New Delivered Location Menu

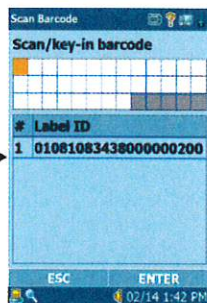

On Street Menu

- 1 Scan Barcode
- 2 Review Entries
- 3 Settings
- 4 Firm Sheet
- 5 Manual Input
- 6 Change Route
- 7 Dynamic Delivery
- 8 Collection Box Info

- 4 Front Desk/Reception/Mail Room
- 5 Parcel Locker
- 6 Garage or Other Location at Address
- 7 Left with Neighbor
- G Authorized Agent
- U Tendered to Authorized Agent

MDD Release 7.1 – Carriers

2. Vehicle Check

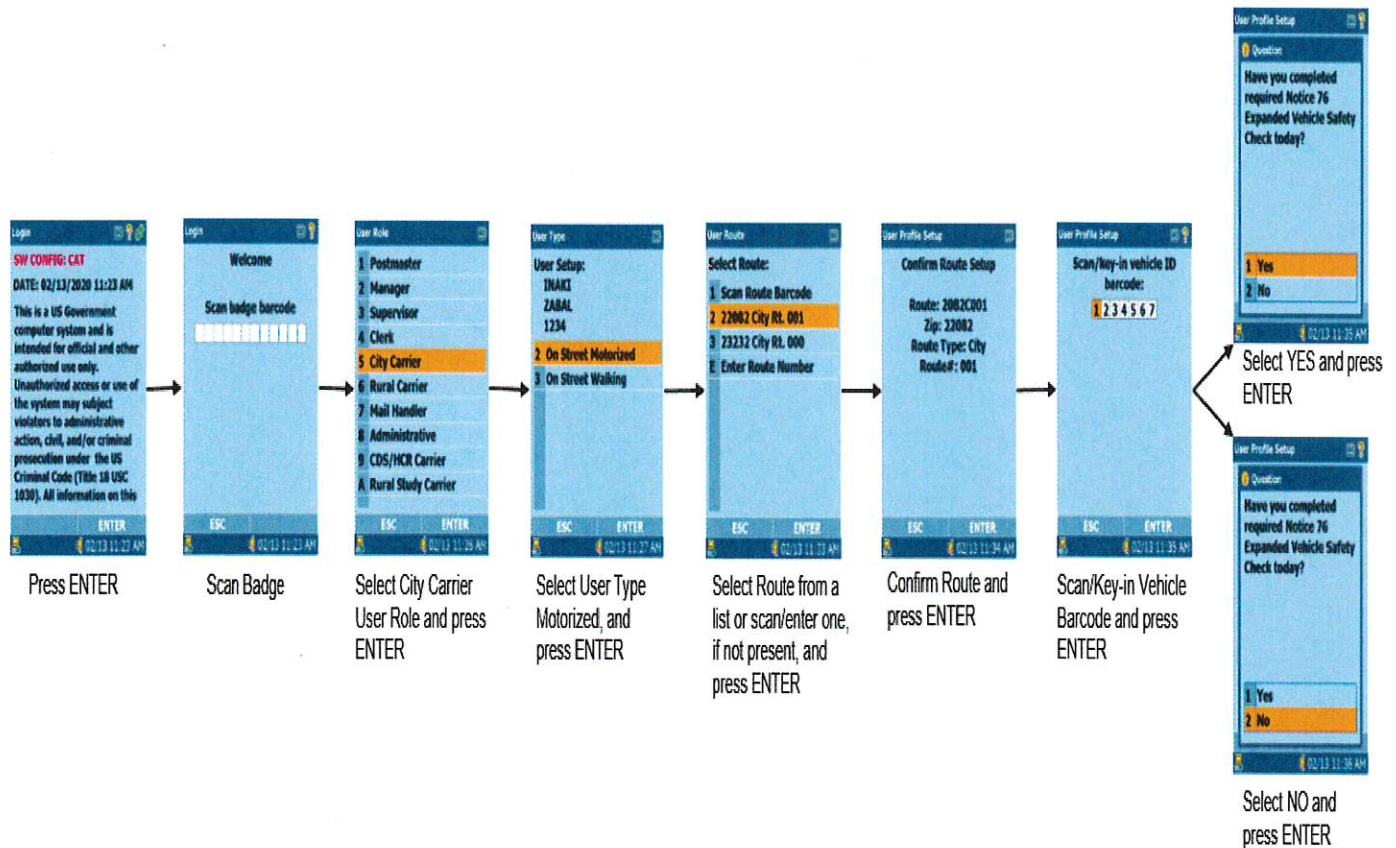

Background

To remind carriers to complete Notice 76 Vehicle Safety Checks after entering the vehicle Identification Number (ID).

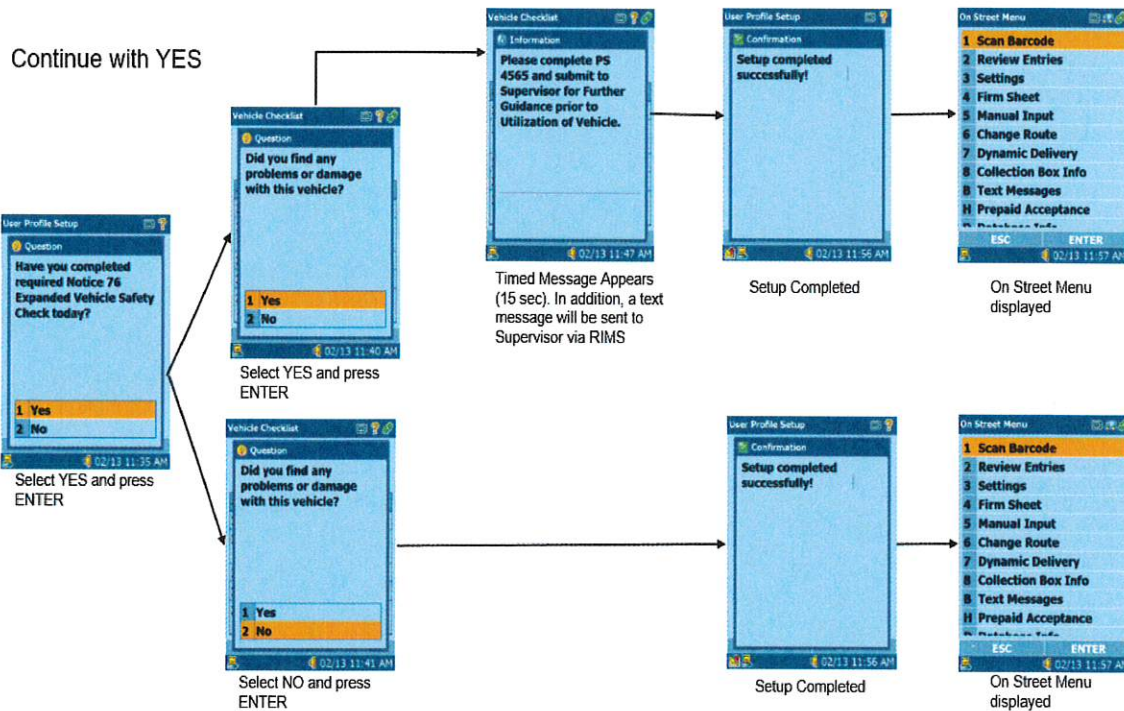

Changes on MDD

The MDD was modified to display a message to all carriers to complete the Notice 76 Vehicle Safety Check. For Rural carriers this will be a timed message (15 seconds) and for City carriers they will be required to respond with a Yes/No. If No is selected, the checklist will be displayed on the MDD.

City Carriers

MDD Release 7.1 – City Carrier (Notice 76 with Yes Selection)

City Carrier (Notice 76 with No Selection)

When YES is selected for "Did you find any problems or damage with this vehicle?" prompt, MDD will send text message to RIMS showing problems or damage was found, including vehicle number

Select Text Messages from On Street Menu
then Outgoing Messages. Press ENTER

Message shows Employee Name
and Route ID. Press ENTER

Message shows Target System,
Priority, and Status. Press ENTER

Screen will show actual
message sent to RIMS

MDD Release 7.1 – Carriers and Clerks

MDD Release 7.1 – Carriers

3. Geo-Alert Workflow Update

Background:

A GPS Correct Delivery Alert (Geo Alert) is an alert that notifies the carriers when a mail piece is potentially being delivered to an incorrect address.

Changes on MDD:

New Geo Alert process will trigger the alert upon selecting the delivery confirmation event instead of alerting upon scanning the barcode/label. Geo Alert audit is limited to the following sub events:

Delivered > In/At Mailbox

Delivered > Front Door/Porch

Attempted> No Authorized Recipient Available

Attempted>Receptacle Full/Item Oversized

Carriers/Clerk

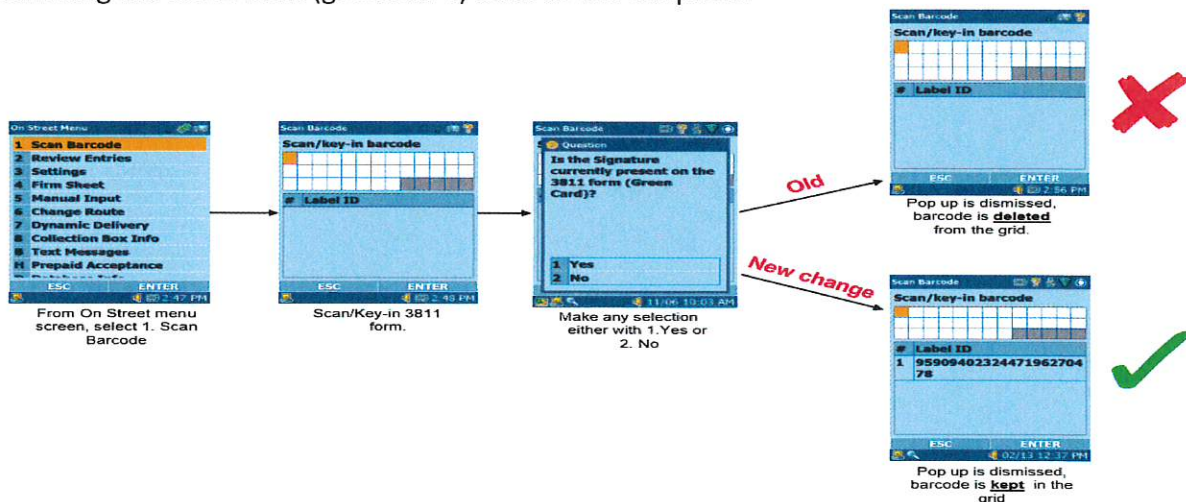

4. Return Receipt Delivery

Background

Currently, after the 3811 sampling popup (“Is the Signature currently present on the 3811 (Green Card)?”), the barcode/label is deleted from the grid, so the carrier has to rescan the 3811 form to complete the delivery workflow.

Changes on MDD

3811 barcode/label will be kept saved in the grid, so the carrier doesn’t have to rescan the barcode, and it’s clear to the carrier that they have to complete the delivery workflow before delivering the 3811 form (green card) back to the recipient.

MDD Release 7.1 – Rural Carriers

5. Unify MDD Software Build

Background

Currently, MDD team maintains multiple software builds in production for each MDD release to support a particular set of software configurations at different locations, based Delivery Operation customer's request. The typical flavors include: regular production, rural study, customized/Sunday delivery (CoPilot enabled), and Geo Alert. Managing multiple different software builds has caused additional work in software development, testing and deployment

Changes on MDD

The numerous MDD builds that are currently used in Production, shall be unified into one comprehensive MDD build, to reduce the time and effort involved in managing and deploying multiple MDD software builds.

New role 'Rural Study Carrier' has been created in Unified MDD build.

When carrier logs in as a "Rural Study Carrier (option A)", upon login completion option R: Rural Route Study becomes available on the On Street Menu, allowing access to Rural Route Study menu. When carriers log in as other user roles, the Option R is not available for selection.

Login as Rural Study Carrier and Complete login process

Select option R. Rural Route Study on On Street Menu and press Enter

Rural Route Study Menu appears
